

Can THC and CBD inform standard cannabis units?

Tom Freeman
SSA Fellow
Senior Lecturer
University of Bath

Overview

- THC
- CBD
- Standard Units
- Conclusion

THC

- **THC (delta-9-tetrahydrocannabinol)**

Intoxicating

↑Anxiety, psychotic-like symptoms

↑Memory impairment

↑Addiction

THC

● Placebo (Vehicle) ◆ 2.5 mg THC ▲ 5 mg THC

Harms:
dose-dependent

Verbal memory
recall poorer with
higher doses

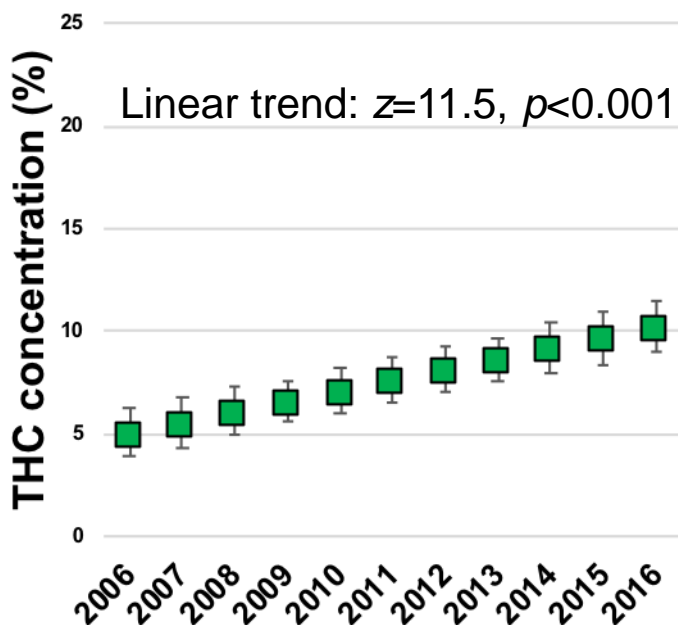

D'Souza et al. (2004) *Neuropsychopharmacology*

THC

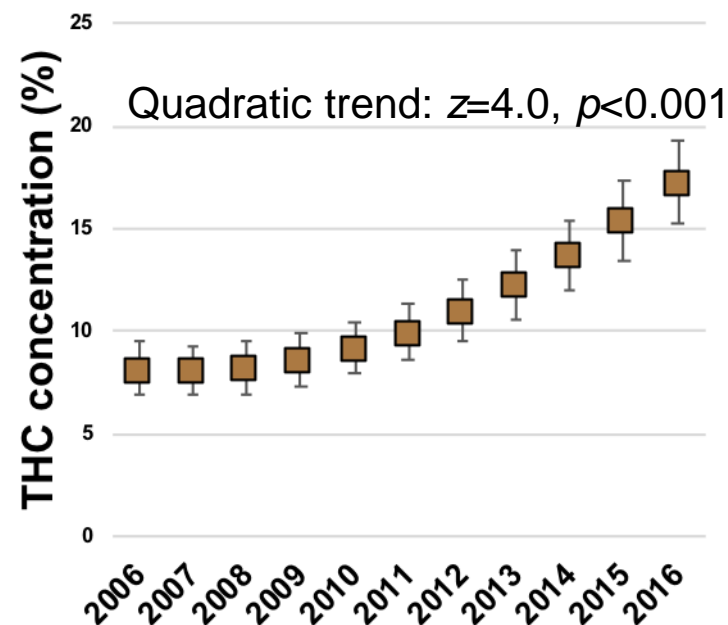

Cannabis potency in Europe

THC in herbal cannabis

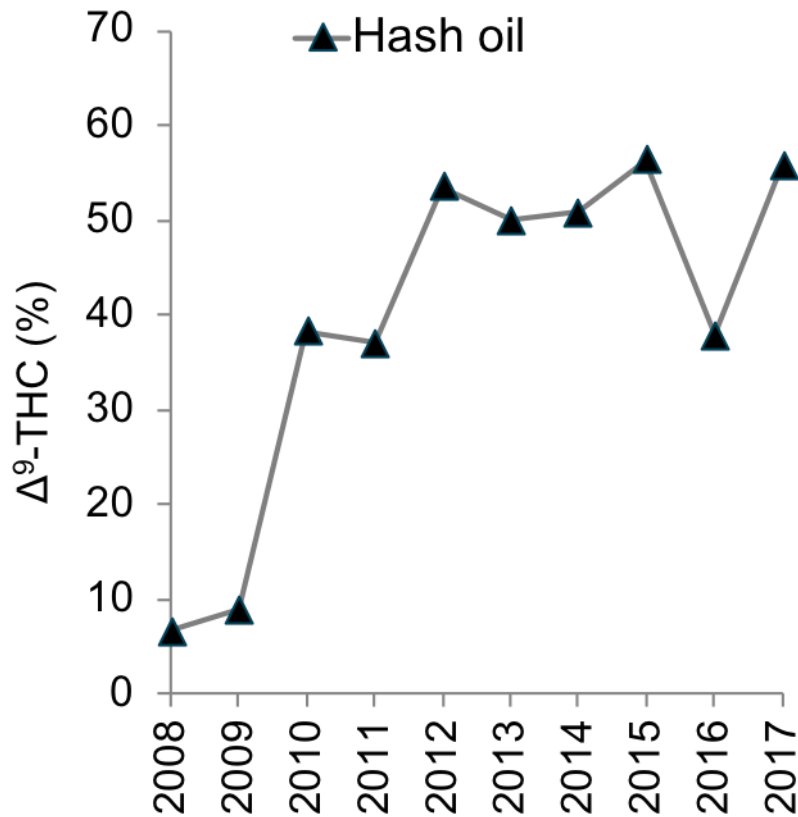

THC in cannabis resin

THC

Cannabis potency in USA

Chandra et al. (under review)

'Concentrates'

>20% sales in legal markets

New routes of administration

Overview

- THC
- CBD
- Standard Units
- Conclusion

CBD

- **THC (delta-9-tetrahydrocannabinol)**

Intoxicating

↑Anxiety, psychotic-like symptoms

↑Memory impairment

↑Addiction

- **CBD (cannabidiol)**

Non-intoxicating

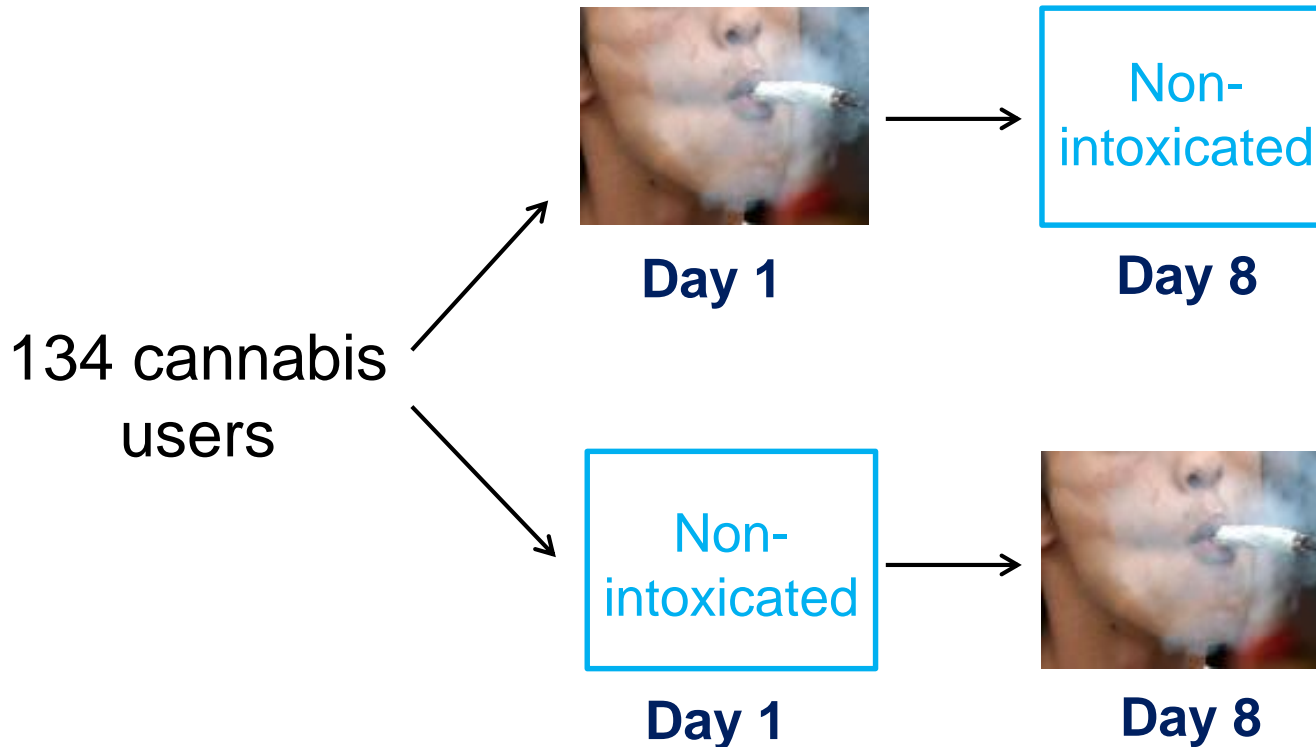

↓Anxiety, psychotic-like symptoms

↓Memory impairment

↓Addiction

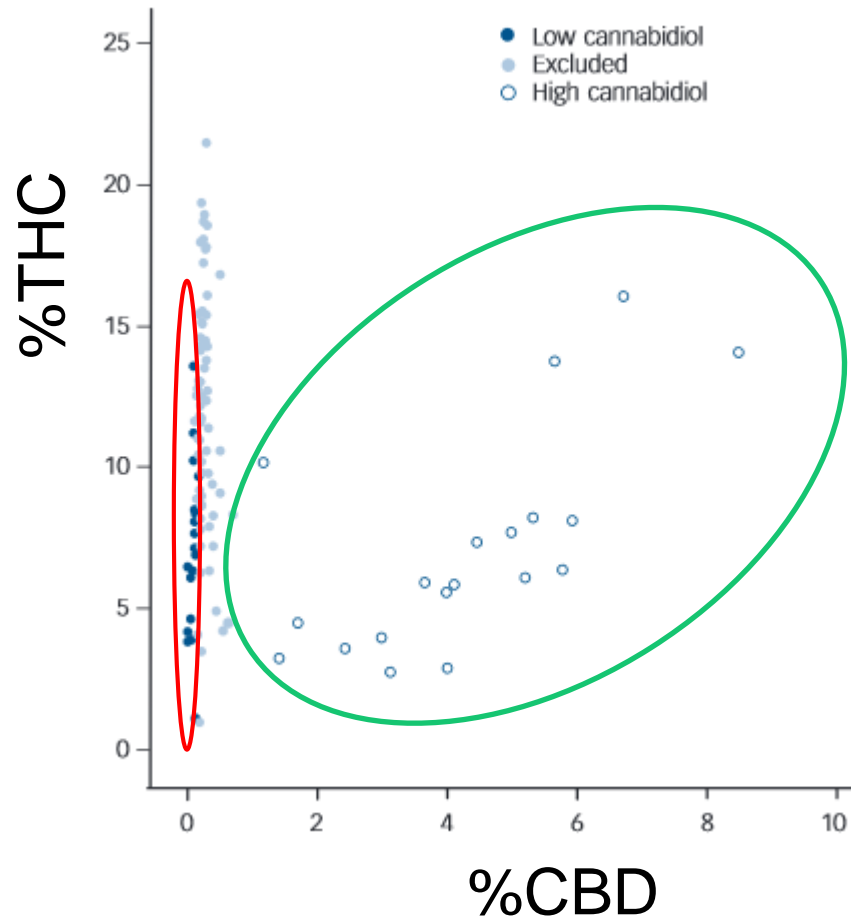

Does CBD protect against THC harms?

Study 1: Naturalistic

Does CBD protect against THC harms?

Low CBD
cannabis
N=22

High CBD
cannabis
(>0.75%)
N=22

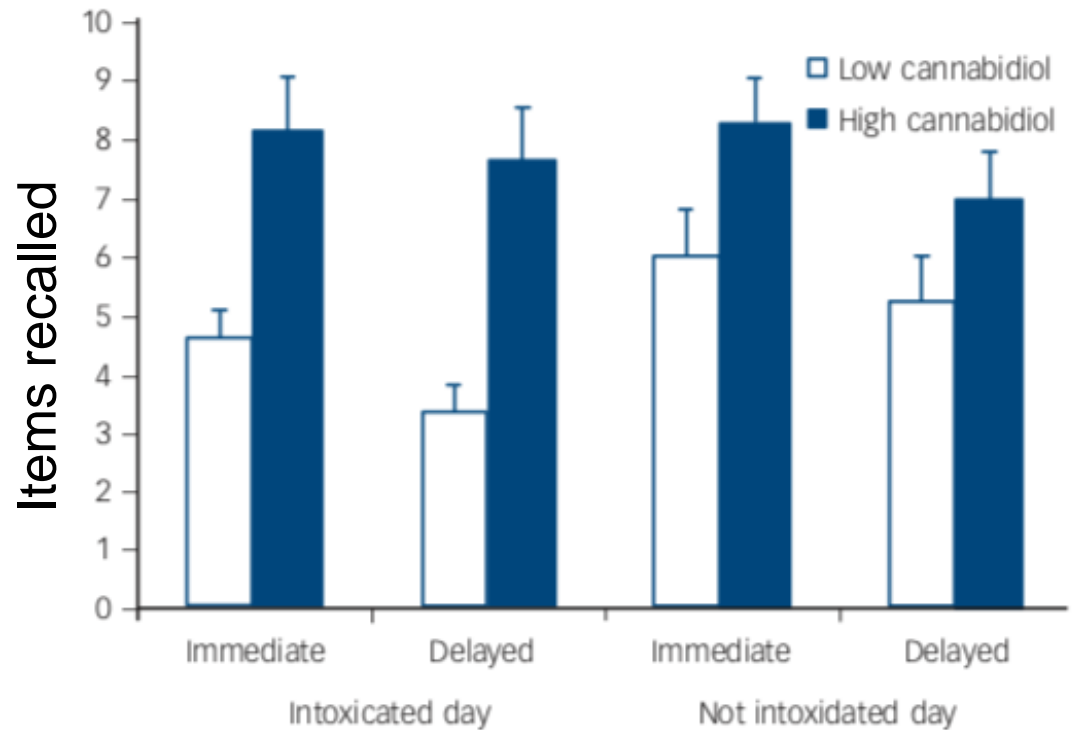

Does CBD protect against THC harms?

Study 1: Naturalistic

Verbal memory:
Listen to 30 second
'news bulletin'

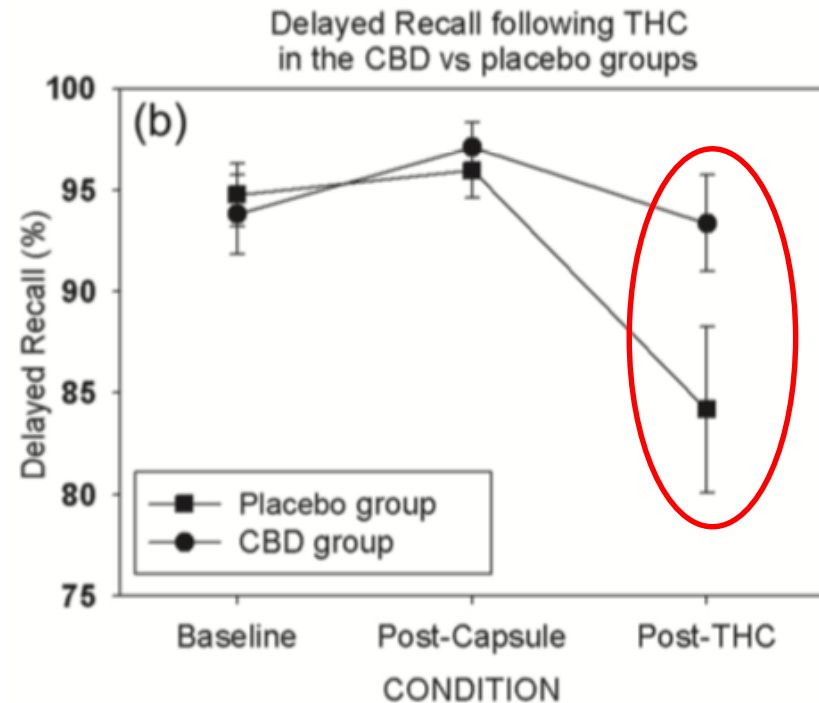

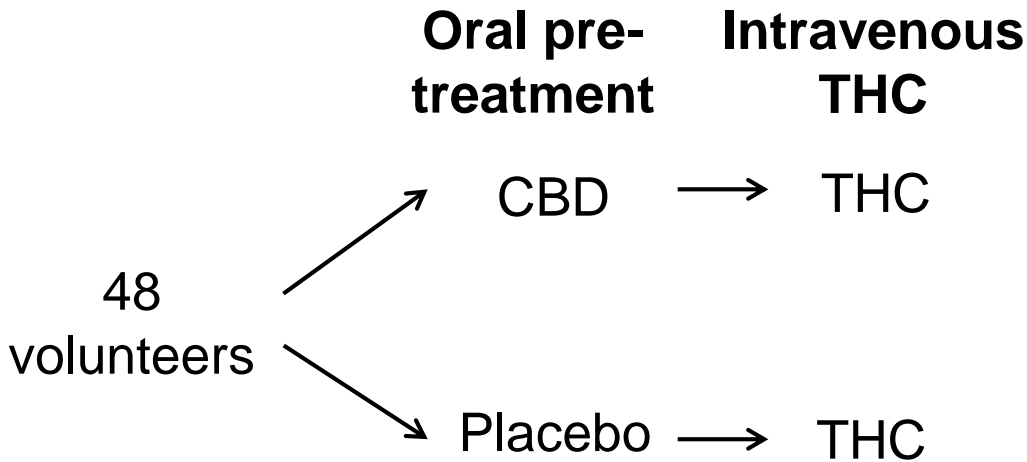

Recall story
Immediate and delayed

Morgan et al. (2010) *British Journal of Psychiatry*

Does CBD protect against THC harms?

Study 2: experimental

Does CBD protect against THC harms?

Study 3: experimental (ongoing)

Which level of CBD is most effective for reducing harm?

10 mg THC

10 mg THC

10 mg THC

10 mg THC

0 mg CBD

10 mg CBD

20 mg CBD

30 mg CBD

Ratio 1:0

Ratio 1:1

Ratio 1:2

Ratio 1:3

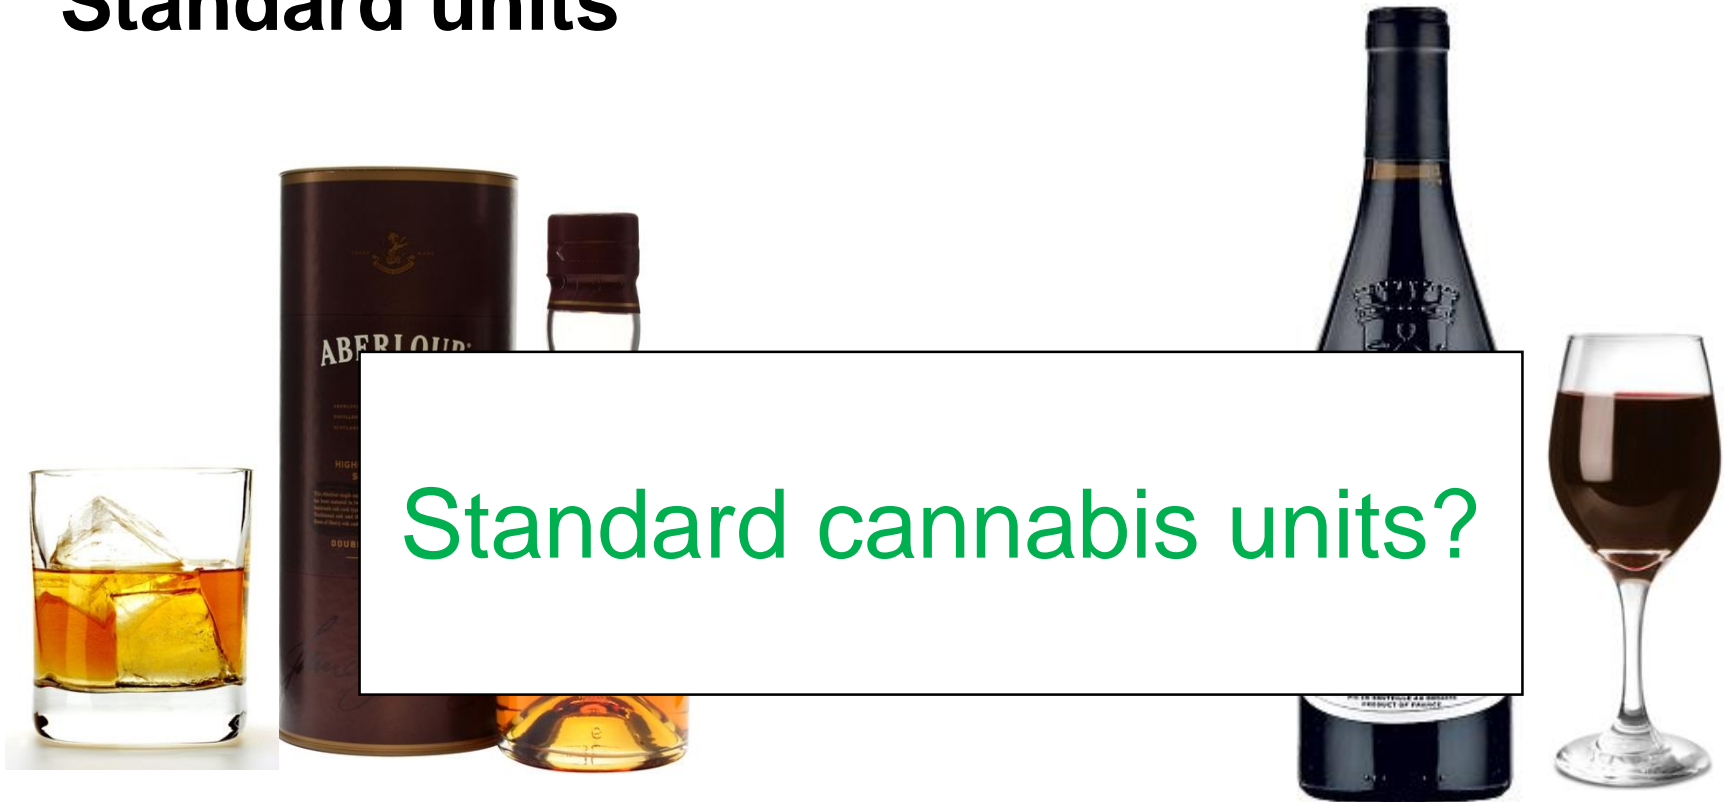

Amir Englund

Overview

- THC
- CBD
- Standard Units
- Conclusion

Standard units

Standard cannabis units?

Whiskey:
40%; 50ml

Wine:
11.5%; 175ml

2 units
(2 x 8g Alcohol)

Standard units

Cannabis increasingly legal (or tolerated) worldwide

How should consumers monitor consumption and minimise harm?

Cannabis use measures: frequency, but *not quantity*

Cannabis standard units

Grams of cannabis

Wetherill et al. (2016) *Cannabis and Cannabinoid Research*

230g
3.7%; 8.5g THC

15g
58%; 8.7g THC

David Potter

Cannabis standard units

Standard Joint Unit

1 Joint = 0.25g cannabis = 7mg THC

Kögel et al. (2017) *Drug & Alcohol Dependence*

1 Joint = 0.30g cannabis = 27mg THC

Freeman et al. (2014) *Addiction*

Different routes of administration

1 Joint = 0.58g cannabis

1 bowl = 0.25g cannabis

1 dab (concentrate) = 0.08g cannabis

Prince et al. (2018) *Psychology of Addictive Behaviors*

Cannabis standard units

Best common metric: mg of THC

Relevant to all products & routes of administration

Concentrate:
50% THC; 0.04g

Herbal:
15% THC; 0.13g

**4 THC units
(4 x 5mg THC)**

Freeman & Lorenzetti (commissioned for debate) *Addiction*

Standard units

Whiskey:
40%; 50ml

2 units
(2 x 8g Alcohol)

Wine:
11.5%; 175ml

Cannabis standard units

Best common metric: mg of THC

Listed at the point of sale

Monitor consumption, safety guidelines

1 gram cannabis
15% THC, <0.1% CBD

30 x 5mg 'THC units'

0 x 5mg 'CBD units'

Overview

- THC
- CBD
- Standard Units
- Conclusion

Can THC and CBD inform standard cannabis units?

- THC harms are dose-dependent
- CBD may reduce harm
- 'THC units' and 'CBD units' (mg) could help people monitor consumption for safer use

Thank you
